KEN\_2022\_K-LSRH\_v01\_M

### TITLE

Longitudinal Socioeconomic Study of Refugees and Host Communities 2022-2023

### SUBTITLE

Wave 1

### ABBREVIATION OR ACRONYM

K-LSRH 2022-2023

### COUNTRY/ECONOMY

Name	Country code
Kenya	KEN

### STUDY TYPE

1-2-3 Survey, phase 1 [hh/123-1]

### SERIES INFORMATION

This cross-sectional survey was conducted with refugee and host community households in Dadaab, Kakuma, Kalobeyei, Nairobi, Nakuru and Mombasa and was conducted between 12 May 2022 to 13 June 2023.

### ABSTRACT

The World Bank in collaboration with the United Nations High Commission for Refugees (UNHCR) and the University of California-Berkeley conducted a cross-sectional survey on refugee and host populations living in camp (Dadaab, Kakuma and Kalobeyei) and urban (Nairobi, Nakuru and Mombasa) locations. This dataset contains information from wave 1 which is part of a panel survey that targets refugees and their hosts communities. Enumerators were trained in a participatory approach where they learned how to collect data specific for refugees as well as nationals. Data quality monitoring was conducted daily during data collection to provide feedback to the field team and correct any arising errors. Data was collected with computer Aided Personal Interviews (CAPI) technique through the Ipsos iField software.

The sample is representative of camp based (Dadaab, Kakuma and Kalobeyei) refugees and their host communities in Turkana and Garissa; and urban based (Nairobi, Mombasa and Nakuru) refugees and their host communities. Refugees were sampled from two frames, the UNHCR registration database proGress and the Socioeconomic Surveys (SES Kakuma, Kalobeyei and Nairobi) in two stages. An overlapping frames correction was used to account for observations with a positive probability of being selected from either frame. Hosts were sampled using a two-step cluster design, whereby a set of Enumeration Areas (EAs) and replacement EAs was drawn with probability proportional to size (PPS) from the universe of eligible EAs. Subsequently, a listing exercise was carried out to eliminate ineligible households including households where one member was registered with UNHCR as a refugee or asylum seeker. In the second stage, 10 households and a list of 5 replacements for the case of non-response was drawn for each selected EA using simple random sampling.

Targeted modules on women empowerment and child education were administered to women aged 15 and above and 5th grade children, respectively. A part of the education module was also answered to the child's caregiver (adult 18 years and above). Unlike other modules, the education module was only implemented in the Kakuma, Kalobeyei, and Dadaab refugee strata and the Turkana and Dadaab host community strata. Targeted modules were also administered to a 'representative respondent', a randomly drawn adult from the household, covering employment, migration, savings and mental health.

The dataset contains four files. hh.dta contains data at the level of the individual for all household members. Each household member is uniquely identified by 'hhid' and 'hhmemid'. hr.dta contains household level information. rr.dta contains data at the representative respondent level. wer.dta contains data for the women empowerment module. The 'hhid' variable uniquely identifies all households.

This survey was conducted between May 2022 to June 2023. It comprises a sample of 9,304 households in total, of which 5,840 are refugees and 3,464 are hosts.

Further information on the Kenya Analytical Program on Forced Displacement can be found on the following dashboard:  
<https://www.worldbank.org/en/data/interactive/2024/06/18/dashboard-kenya>

**KIND OF DATA**

Sample survey data [ssd]

**UNIT OF ANALYSIS**

Household, individual.

**Version****VERSION DESCRIPTION**

v01 - Edited, anonymized dataset for public distribution.

**Scope****NOTES**

This survey covers four major modules named after their respondents: the 'Household respondent (HR)', 'Representative respondent (RR)', 'Women empowerment respondent (WER)' and 'Child respondent (CR)'. The HR module covers the following topics: demographics, dwelling characteristics, consumption and expenditures, and household members' labor. The RR module includes a more in-depth module on labor in addition to modules on food insecurity and assistance, transfers and remittances, household shocks, savings and credit, migration, social cohesion and social capital, health and wellbeing, marriage, fertility, ethnicity and religion and weather variability. The WER module covers women empowerment for female respondents aged 15 and above. Finally, CR module covers the education and aspirations of 5th grade children and their caregivers.

The CR module is available upon request only, as are the submodules on child labor (A8.3), HR agriculture (A8.1-E2) and RR agriculture (B3E1).

**Coverage****GEOGRAPHIC COVERAGE**

Garissa, Turkana, Nairobi, Nakuru and Mombasa counties, Kenya

**Sampling****SAMPLING PROCEDURE**

The survey has two primary samples contained in the 'status' variable: the refugee sample and the host community sample.

Refugees were sampled from two frames, the UNHCR registration database proGres and the Socioeconomic Surveys (SES) conducted in Kakuma, Kalobeyei and Nairobi. ProGres holds information on all refugee and asylum seekers families in Kenya registered with UNHCR including their phone numbers and the approximate location, data on nationality. The second frame consists of the samples of the Kalobeyei SES (2018), Kakuma Refugee Camp SES (2019) and Urban SES in Nairobi (2020-21). It holds rich socioeconomic baseline data and is a subset of the first. In the first stage, a subsample of proGres families is drawn from the entire proGres frame using implicit stratification by sub-county and nationality. Notably, proGres families are not always the same as households defined in standard surveys. For K-LSRH, a household is defined as a "person or group of people living in the same compound (fenced or unfenced); answerable to the same head and sharing a common source of food/share cooking arrangement." Meanwhile, proGres families refer to the group of people in which refugees are registered to UNHCR. A household can comprise of multiple proGres families and the selection probability has been adjusted accordingly.

In the second stage, an independent subsample was drawn from the SES frame for each of the strata with the existing SES. Households who had arrived in Kenya before the SES and who had not left the country, represented an overlap group which has a positive probability of being selected into the sample through both the SES frame and through proGres directly. For this subset of households, weights were adjusted using an overlapping frames correction.

Hosts were sampled using a two-step cluster design. The sampling frame of host households consists of communities living in close proximity to refugees who are potentially impacted by their presence. The host community of camp refugees in Turkana and Dadaab are defined as those living within a 15 km radius of the camp borders, while host communities of urban refugees are defined as neighborhoods hosting at least 10 percent of proGres families living in each city of the stratum including; Kayole, Eastleigh North, and Kasarani in Nairobi, Old Town and Majengo in Mombasa, and Lanet, Shabaab, and Langalanga in Nakuru. Sampling follows a two-step clustered design, whereby a set of Enumeration Areas (EAs) and replacement EAs is drawn with probability proportional to size (PPS) from the universe of eligible EAs. Subsequently, a listing exercise was carried out to eliminate ineligible households including households not living within the boundary of selected EAs and households not providing consent to the listing interview. Households where one member was registered with UNHCR as a refugee or asylum seeker were also not interviewed, to rule out overlap with the refugee sampling frame. In the second stage, for each selected EA, 10 households and a list of 5 replacements for the case of non-response was drawn using simple random sampling. This resulted in a sample of 2,000 households for the host community of camp refugees and of 1,500 households for the host community of urban refugees.

A representative respondent (RR) was randomly selected from among the household members aged 18 and above and administered a set of in-depth modules on employment and individual-level characteristics. In addition, the survey included a module on women's empowerment, administered by trained female enumerators to randomly selected female respondents aged 15 and above. If the RR was a woman, the same respondent also completed the woman empowerment module; otherwise, a woman aged 15 years and above was selected among the women in the household based on simple random sampling. Finally, a module on child education and aspirations was administered to a cohort of upper primary school children and their main caregivers. One Child Respondent (CR) was randomly selected among 5th-grade students currently attending school of any age up to and including 17 years (to also capture over-age students) in selected households. The child's main caregiver (CG) was also interviewed to capture parental aspirations and main barriers to education. The Caregiver refers to the household member responsible for making the educational decisions for the child. Unlike other modules, the Education Module was only implemented in the Kakuma, Kalobeyei, and Dadaab refugee strata and the Turkana and Dadaab host community strata.

#### WEIGHTING

Weights are calculated separately for refugees drawn from the proGres frame and the SES frame. Refugees drawn from proGres were selected using simple random sampling (SRS) and their base weights equal the inverse of the selection probability. Weights are then adjusted to account for the possibility of multiple proGres families forming one surveyed household and for the possibility of nonresponse. Finally, weights are post-stratified to population totals.

For refugees drawn from the SES frame, the socioeconomic surveys serve as a baseline survey, and weights can be calculated following the approach for panel survey weights:

1. Begin with the base weights (i.e., those from the baseline survey).
2. Multiply base weights with the inverse of the probability of sub-selection from the SES frame into the K-LSRH sample.
3. Adjust weights for nonresponse/attrition.
4. Post-stratify to known population totals.

Finally, after obtaining nonresponse adjusted weights for both subsamples, weights are adjusted for the possibility of some households having been drawn from both frames. This is achieved using a single frame estimator method.

Final household weight variable: weight.

For hosts, the weight incorporates two selection probabilities: The probability of the enumeration area being selected for

listing and the probability of the household being subsequently selected for interview. The host weight equals the inverse of the multiple of both selection probabilities, adjusted for nonresponse and post-stratified to population totals obtained from the 2019 Kenya Population and Housing Census.

Final household weight variable: weight.

The nonresponse adjustment step in all three cases follows the same procedure:

1. A linear logistic model is estimated on a set of observable characteristics, including demographics and location, to obtain a predicted response probability or propensity score (PS) for each household.
2. Households are ranked by PS and split into 10 equal groups.
3. The attrition adjustment factor (ac) is calculated as the reciprocal of the mean empirical response rate for the propensity score decile.
4. The base weights ( $w_{-1}$ ) are adjusted by multiplying with the ac-factor:  $w_{-2}=w_{-1} \cdot ac$

The representative respondent (RR) is randomly drawn from the list of adult household members. If the household had both male and female members aged 18+, the gender of the RR was first selected at random. If all adults have the same gender, that gender is selected automatically. The RR is then drawn from the list of members of the selected gender using simple random sampling. RR weights are calculated in four steps:

1. Calculate the probability of the gender being selected: P1. This is either 1 if the household has only male/female adult members, or  $\frac{1}{2}$  if the household has adult members of both genders.
2. Calculate the probability of a member being selected: P2. This equals  $1 / (\text{number of eligible members of the selected gender})$ .
3. Calculate the final probability of the RR being selected:  $P_{rr} = P1 \cdot P2$ .
4. Scale household weights by  $1 / P_{rr}$ .

Variable: weight\_rr.

For the Education Module, one child respondent (CR) is randomly drawn among the 6th-grade children in selected households using a simple random sampling. The probability of a CR being selected from an interviewed household ( $p_{cr}$ ) is therefore equal to the inverse of the number of 5th-grade students in the household, and CR weights are calculated by scaling the household weight by the inverse of  $p_{cr}$ .

Variable: weight\_cr.

If the RR is a woman, she is automatically selected as the Women Empowerment respondent (WER) and assigned the RR weight. If the RR is a man, the WER was selected at random among the women/girls aged 15 and above and the WER weight is scaled by the selection probability.

Variable: weight\_wer.

## Data collection

---

### DATES OF DATA COLLECTION

Start	End	Cycle
2022-05-13	2023-06-12	Wave 1

### DATA COLLECTION MODE

Computer Assisted Personal Interview [capi]

### DATA COLLECTION NOTES

**PRE-LOADED INFORMATION:** Basic household information from the host community household listing (hosts), UNHCR's proGres database and SES database (refugees) was pre-loaded in iField for each enumerator. The information, for example the household's location, household head name, phone numbers etc, was used to help enumerators identify the target households.

**RESPONDENTS:** The survey had four modules responded by various respondents per households. The Household module was responded by Household Respondent (HR) who was any knowledgeable adult (18 years or older) who was willing to provide information about the household. The Representative Respondent module was responded to by a Representative respondent (RR) who was a randomly selected adult (18 years or older). The RR could be the same person as the HR or was randomly selected from the household roster if the HR was not available. The women empowerment module was responded by a Women empowerment respondent (WER) who could be the same person as the RR if RR was a woman, otherwise, a girl/woman aged 15 years and above was randomly selected as WER. The education module was responded by two respondents namely Child respondent (CR) and caregiver (CG). The CR was a randomly selected child among 5th-grade

students currently attending school of any age up to and including 17 years (to also capture over-age students). The child's main caregiver who is the household member responsible for making educational decisions for the CR was also interviewed.

## Questionnaires

---

### QUESTIONNAIRES

Targeted modules on women empowerment and child education were administered to women aged 15 and above and 5th grade children, respectively. A part of the education module was also answered to the child's caregiver (adult 18 years and above). Unlike other modules, the education module was only implemented in the Kakuma, Kalobeyei, and Dadaab refugee strata and the Turkana and Dadaab host community strata. Targeted modules were also administered to a 'representative respondent', a randomly drawn adult from the household, covering employment, migration, savings and mental health.

The Questionnaire is provided as external resources in pdf format. Questionnaires were produced through the Ipsos developed iField software.

## Data Processing

---

### METHODOLOGY NOTES

When variable names consist of a letter and a number, the letter indicates the questionnaire section and the number the order in which the question was administered. An explanation of the variable contents is contained in the variable labels.

Extended missing values are used to indicate why a value is missing for all variables. The following extended missing values are used in the dataset:

- .a for 'Don't know'
- .b for 'Refused to respond'
- .c for 'Outliers set to missing'
- .d for 'Variables dropped during anonymization due to PII'
- .e for 'Field Skipped' (where an error in the survey tool caused the question to be missed)
- .z for 'Not applicable' (as the variable was not relevant to the observation)

## Access policy

---

### CONFIDENTIALITY

Before being granted access to the dataset, all users have to formally agree: 1. To make no copies of any files or portions of files to which s/he is granted access except those authorized by the data depositor. 2. Not to use any technique in an attempt to learn the identity of any person, establishment, or sampling unit not identified on public use data files. 3. To hold in strictest confidence the identification of any establishment or individual that may be inadvertently revealed in any documents or discussion, or analysis. Such inadvertent identification revealed in her/his analysis will be immediately brought to the attention of the data depositor.

### CITATION REQUIREMENTS

Use of the dataset must be acknowledged using a citation which would include:

- the Identification of the Primary Investigator
- the title of the survey (including country, acronym and year of implementation)
- the survey reference number
- the source and date of download

V51	a4c_notattenddaycare_other	2. Reason not attending preschool: other	
V52	a4c_staynotinsch_homewithparent	3. Stay when not school:At home with a parent	
V53	a4c_staynotinsch_homewithadult	3. Stay when not school:At home with another adult relative/friend	
V54	a4c_staynotinsch_homebythemselves	3. Stay when not school:At home by themselves	
V55	a4c_staynotinsch_outsidehome	3. Stay when not school:Outside the home with a friend/relative	
V56	a4c_staynotinsch_familytowork	3. Stay when not school:Coming with family member to work	
V57	a4c_staynotinsch_daycare	3. Stay when not school:Daycare / other childcare	
V58	a4c_staynotinsch_homewithmaid	3. Stay when not school:At home with maid / domestic helper	
V59	a4c_staynotinsch_other	3. Stay when not school:Other	
V60	a4c_caregiverrelation	5. What is the primary caregiver's relationship with {a4c.ceduname}?	
V61	a4_above65	Number of people in hh above 65 years of age	
V62	a4_outofschool	Indicator for out of school system (never attended or no longer in school)	
V63	a4_cbc	Indicator for part of CBC curriculum	
V64	a4_prim_sch_age_844	Primary School Age for cohort enrolled in 8-4-4 curriculum (ages: 6-13)	
V65	a4_prim_sch_age_CBC	Primary School Age for cohort enrolled in CBC curriculum (ages: 6-11)	
V66	a4_sec_sch_age_844	Secondary School Age for cohort enrolled in 8-4-4 curriculum (ages: 14-17)	
V67	a4_sec_sch_age_CBC	Secondary School Age for cohort enrolled in CBC curriculum (ages: 12-17)	
V68	a4_prim_sch_age	Dummy=1 if of primary school age (irrespective of curriculum)	
V69	a4_sec_sch_age	Dummy=1 if of secondary school age (irrespective of curriculum)	
V70	a4_prim_enrolled	Enrolled in primary school irrespective of age	
V71	a4_sec_enrolled	Enrolled in secondary school irrespective of age	
V72	a4_prim_enrolled_net	Indicator for enrolled in primary IF of primary school age	

ID	Name	Label	Question
V73	a4_sec_enrolled_net	Indicator for enrolled in secondary IF of secondary school age	
V74	a4_numdaysabsent	Number of school days missed in the last week	
V75	a4_absenteeism	Absenteeism rate from school in the last week	
V76	a4_attendance_prim	Indicator for attending primary school irrespective of age	
V77	a4_attendance_sec	Indicator for attending secondary school irrespective of age	
V78	a4_attendance_prim_net	Indicator for attending primary IF of primary school age	
V79	a4_attendance_sec_net	Indicator for attending secondary IF of secondary school age	
V80	a4_female_headed_hh	Indicator for HH headed by a female	
V81	a4_rr_is_hh	RR is the same person as the HH head	
V82	a4_rr_is_hr	RR is same person as HR	
V83	a4_m_nochildren	1 adult male, no children	
V84	a4_m_children	1 adult male, with children	
V85	a4_f_nochildren	1 adult female, no children	
V86	a4_f_children	1 adult female, with children	
V87	a4_mf_nochildren	1 adult female & 1 adult male, no children	
V88	a4_mf_children	1 adult female & 1 adult male, with children	
V89	a4_adults_nochildren	2 adults of the same sex or 3+ adults, no children	
V90	a4_adults_children	2 adults of the same sex or 3+ adults, with children	
V91	a4_seniors_nochildren	Seniors only, no children	
V92	a4_seniors_children	Seniors only, with children	
V93	a4_hh_nonbiochild	HH has at least 1 child whose biological parents are not in HH	
V94	a4_female18_in_hh	HH has at least 1 female 18+	
V95	a8_a1_hhmemworklist7days	1. Employee for WAGE, salary, commission, incentive or any payment in kind?	
V96	a8_a1_hhmemwork_incentive	1a. Was..'s wage work partly or exclusively an incentive work?	
V97	a8_a1_workfor1hrownaccount	2. Own account worker or employer in a NON-FARM business enterprise?	
V98	a8_a1_workfor1hrfamilyccount	3. Worked on own/family account or as an employer on a FARM holding owned/rented	
V99	a8_a1_helpednonfarmbusiness	4. Helped in a NON-FARM business enterprise belonging or run by THIS HOUSEHOLD?	
V100	a8_a1_helpedagriculturalactivity	5. Helped in AGRICULTURE or cared for livestock belonging to THIS HOUSEHOLD?	
V101	a8_a1_workintern_apprentice	6. Worked as an INTERN or an APPRENTICE?	
V102	a8_a1_workedvolunteer	7. Worked as a VOLUNTEER?	
V103	a8_a1_paidjobreturnto	8. Does he/she have A PAID JOB that he/she would definitely return to?	
V104	a8_a1_nonfarmbusinessreturnto	9. Does he/she have A NON-FARM BUSINESS that he/she would definitely return to?	
V105	a8_a1_farmactivityreturnto	10. Does [name] have AN OWN/FAMILY FARMING ACTIVITY to return to?	
V106	a8_a1_internshipreturnto	11. Does [name] have AN APPRENTICESHIP or INTERNSHIP to return to?	
V107	a8_a1_volunteerreturnto	12. Does [name] have A VOLUNTEER ACTIVITY to return to?	
V108	a8_a1_whyabsentfromwork	13. Why was....absent from work during the last 7 days?	
V109	a8_a1_contractreturntowork	14. Has a contract to return to the job, or the business is still operational?	
V110	a8_a1_receiveincomeafterabsence	15. Does..(continue to) receive an income from his/her job during this absence?	

ID	Name	Label	Question
V111	a8_a1_timeawayfromwork	17. After how long wil..return to work?	
V112	a8_b0_num_econ_activities	1. How many economic activities including jobs held did ....engage in the last 7	
V113	a8_b0_1st_act_status	2. What is the status of ...s PRIMARY ACTIVITY in terms of time?	
V114	a8_b0_1st_act_hrs_avrg	2a. How many hours does ... USUALLY work per week in this PRIMARY ACTIVITY?	
V115	a8_b0_1st_act_hrs_last7	2b. How many hours did .. ACTUALLY work in the last 7 days in the PRIMARY job?	
V116	a8_b0_1st_act_paid_dummy	3. Does ..get paid for this PRIMARY ACTIVITY?	
V117	a8_b0_1st_act_paid_amt	4. How much did [name] earn from wages last month from this PRIMARY ACTIVITY?	
V118	a8_b0_1st_act_paid_days_month	5.In that last month, how many days did.. work to earn that money?	
V119	a8_b0_1st_act_profit_bus_month	6. What was [name]'s total profit from the PRIMARY BUSINESS ACTIVITY last month?	
V120	a8_b0_1st_act_profit_ag_month	7. What was [name]'s total profit from the PRIMARY AGRIC ACTIVITY last month?	
V121	a8_b_action_agency	1.Action taken:Registered or waited at employment agency	
V122	a8_b_action_dispute	1.Action taken:Registered a dispute
